

## REACTJS COURSE CONTENT

- ✓ JavaScript
- ✓ Basics of JavaScript.
- ✓ Creating classes
- ✓ Creating private/public/global fields
- ✓ Creating private/public/global functions
- ✓ Dynamic rendering with JavaScript
- ✓ Events
- ✓ React
- ✓ Introduction to React
- ✓ Original DOM vs Virtual DOM
- ✓ React Components
- ✓ React Components with JSX
- ✓ React Components with ES6
- ✓ Props and state
- ✓ Node
- ✓ Basics of Node and Installation.
- ✓ Introduction to Npm
- ✓ Adding and removing modules
- ✓ React with Node
- ✓ Creating an application using Create React App.
- ✓ Life Cycle
- ✓ Debugging
- ✓ Default values
- ✓ SetState in depth
- ✓ Creating Forms
- ✓ Creating Table
- ✓ Handling Events
- ✓ Applying Filters
- ✓ JSX in depth
- ✓ Validations
- ✓ Applying Styles
- ✓ Backend calls
- ✓ Stateful Components
- ✓ Stateless Components
- ✓ Local Storage

Leader in online training

- ✓ Routing
- ✓ Basic Routing and Passing Params
- ✓ Hyperlinks
- ✓ Master Pages
- ✓ Reconciliation
- ✓ Creating Reusable Components
- ✓ React.Component vs React.pure Component
- ✓ Composition vs Inheritance
- ✓ Code Reusability and Optimization
- ✓ Fragments
- ✓ Bundling
- ✓ Deploying
- ✓ Integration of 3rd party Modules
- ✓ Google Maps
- ✓ Bootstrap Controls
- ✓ Material UI
- ✓ Toast Messages for notifications
- ✓ Others
- ✓ Other Debugging Options
- ✓ Developer Tools
- ✓ Current Applications developed in React
- ✓ Future of React.
- ✓ Introduction to Starter Kits
- ✓ Integration with other libraries
